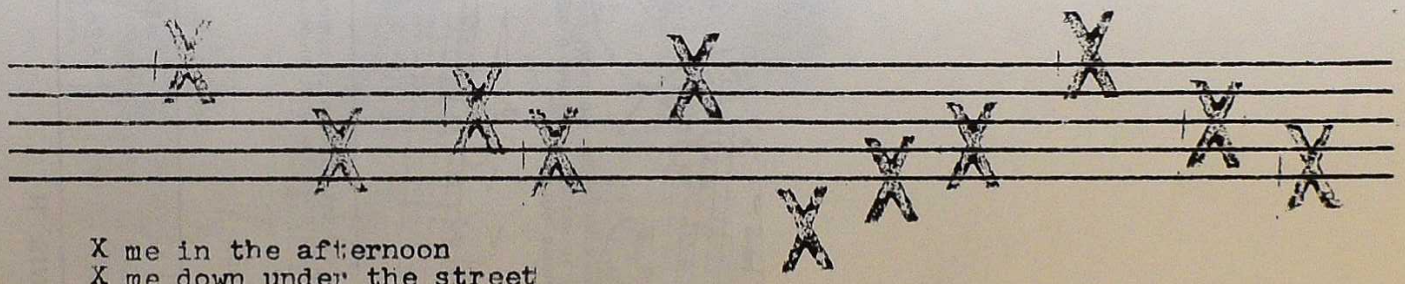
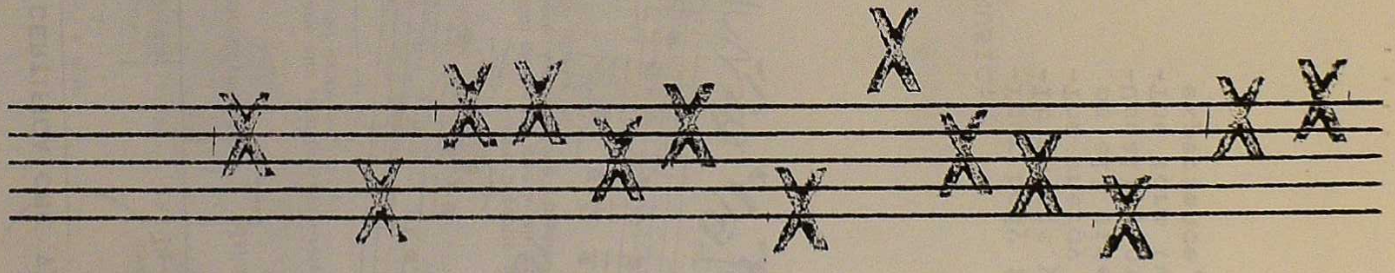
MUSIC:

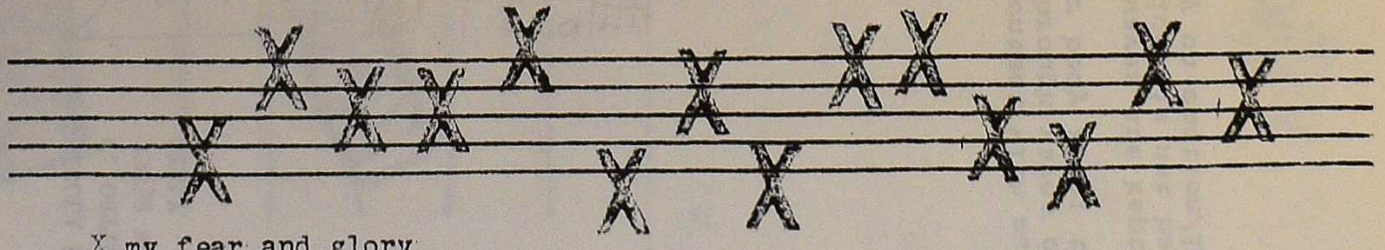
-Your body is not in contact with music.
-It enters your body through waves of energy (sound).
-The energy enters your body after traveling around you on all sides.
-Usually, other sound waves are kept to a minimum.
-The form (without lyrics) is not based on common audial experience, but solely on emotion/intuition.



X me in the afternoon
X me down under the street
been Xed in both my eyes
X across the soles of my feet



those X lines woo me
that X calls me far away
I get X in my dreams
X pulls me through the day



X my fear and glory
X my belief in right or wrong
all my dreams locked in those crossed lines
and these lines are whats left of my X song
